

INCLEMENT WEATHER PROCEDURE

In case of inclement weather (snow storm, freezing rain, etc...) the Lycée Français de Toronto will follow the procedures listed below:

1. Inclement weather starts BEFORE the beginning of the school day :

Transport: In case of school bus service cancellation (for the morning trip), the information will also be posted on the LFT website home page before 6:45am, and an email will be sent. For the afternoon trip, an email will be sent around 12pm (same day) to inform the parents if the buses are running or not. **School will remain open and classes will continue as usual.**

School closure: If a decision to close the school is taken, a message will be posted on our website and an email will be sent out to all LFT families before 7am. Please take this into account as there will be no class or daycare this day. **This situation is very rare.**

2. Inclement weather occurs DURING school day :

Transport: In case of school bus service cancellation for the afternoon trip, an email will be sent to the parents (around 12pm) and the information will be posted on the website.

School will remain open and we will ensure supervision until parents arrive (even after regular hours). If possible, classes will take place as scheduled.

However, if parents wish to pick up their children during the day, please follow the procedure below:

Primary students (PK to grade 5): Parents must send an email to the classroom teacher as well as the administration at michael.faro@lft.ca or contact the reception at: 416-924-1789 ext.225.

Secondary students (grade 6 to grade 12): Parents must send an email at viescolaire@lft.ca or call Vie Scolaire at: 416-924-1789 ext.235. Please note that students will not be permitted to leave LFT if we do not receive the parental consent.

In any case, we invite you to check our website before coming to school: www.lft.ca

- *When temperature and/or windchill factor indicates -28°C or lower children will remain indoor.*
- *When temperature and/or windchill factor indicates -20°C to -28°C, recesses may be shortened depending on local conditions.*
